Video Plus: Static End Card

Video Plus includes a full screen video that plays instantly. A SKIP button to skip the video to reveal a static end card appears at the 7.5 sec mark. The video automatically resolves to the same static end card with optional buttons if seen through to completion.

Static End Card - Portrait

Ad Dimensions	Image Dimensions	Safe Content Area	Max File Size
High-res only			
800 x 1200	800 x 1200	680 x 1000	300 KB
Close Button	Replay Button	Optional Buttons	
Appears in the top right 50x50 pixels	Appears in the top left 50x50 pixels	Consider that each added button appears centered at the bottom while designing	

Static End Card - Landscape

Ad Dimensions	Image Dimensions	Safe Content Area	Max File Size
High-res only			
1200 x 800	1200 x 800	1000 x 530	300 KB
Close Button	Replay Button	Optional Buttons	
Appears in the top right 50x50 pixels	Appears in the top left 50x50 pixels	Consider that each added button appears left justified in the bottom left corner while designing

Video Plus: Static End Card

(continued)

Raw Assets Delivery

File Format

- Layered PSDs for end card

Video

- Length: 15 to 30 seconds
- Format: MP4 or MOV
- Encoding: H.264 encoding
- Aspect Ratio
 - Standard: 16:9 (preferred) or 3:2
 - Vertical: 9:16
- Bit rate: 5 MB
- Frame rate: 30fps preferred
- Audio: AAC

VAST tags accepted for units without end card

Availability

Devices

- iPhone, Android Smartphone
- iPad, Android Tablet

Placement

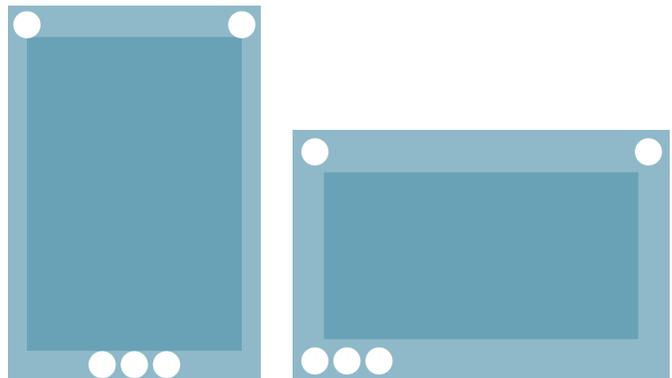

- In-App only

Button Options**3rd Party Served**

Video Plus units are site served only

Metrics

- Video impressions
- Video Quartiles (25%, 50%, 75%, 100%)
- Multiple tracking pixels supported
- 3rd party tracking accepted (metrics listed above) for all site-served units via an approved vendor

**Safe Content Area**

To consider button placements and varying screen sizes, constrain all necessary information into the provided safe content area when designing the end card. The space outside of the safe content area should act as a bleed that may be cropped into according to screen size.

Appendix

Ad Dimensions vs. Image Dimensions

Ad Dimensions are the number of pixels in the ad placement. Image Dimensions are the number of pixels in the image used in the ad placement. For hi-resolution graphics, the image dimensions are 2x the ad dimensions, so there are more pixels in the same ad space. This creates a crisper, clearer looking ad.

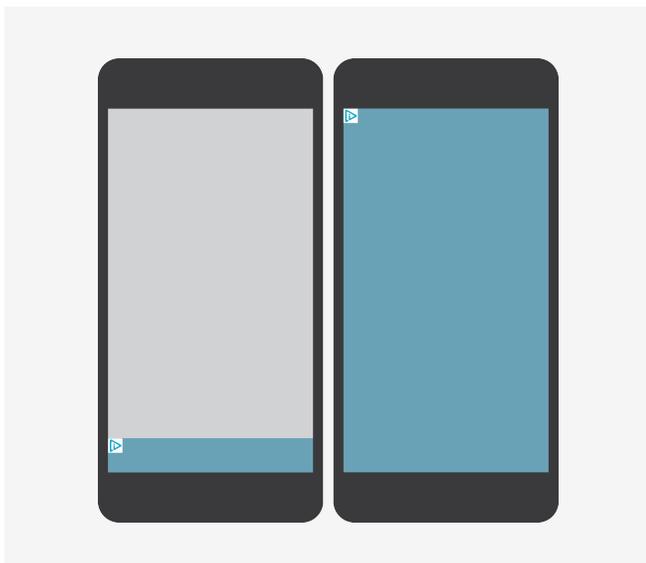

Creative Positioning

Creatives are always centered within the ad placement; therefore, in landscape orientation the large screen extension is on the left and right. See our "Design Guides" for further information.

Appendix

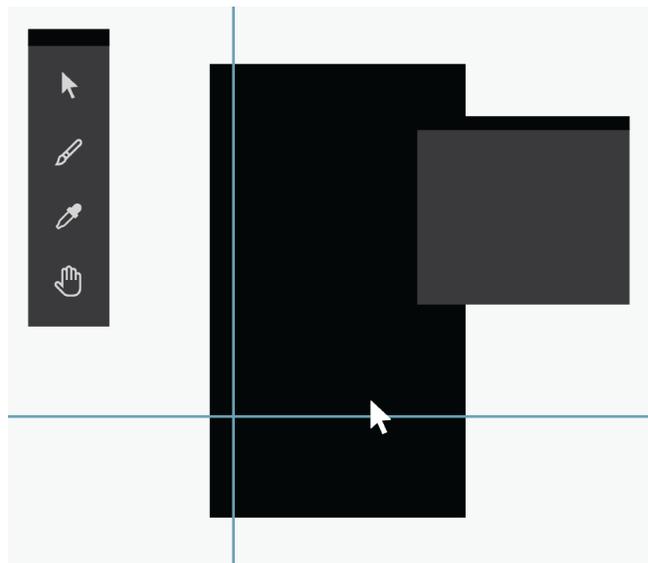

DAA Ad Marker

The DAA (Digital Advertising Alliance) sets the standards for self-regulation of digital privacy and is enforcing industry-wide Mobile Privacy standards ensuring that the Ad-Choices logo and opt-out capability will be a part of creatives tied to audience campaigns using cross-app data.

By default, the Ad Marker appears in the top left 15 x 15 pixel corner of any banner, expanded banner, interstitial or video wrapper, however it may appear in any corner except the top right upon request. Video Plus products always display the Ad Marker in the bottom right 15 x 15 pixel corner.

Upon a tap, the 15 x 15 pixel icon expands to reveal information about Millennial Media and interest-based advertising and gives the user the option to opt out of behavioral targeting.

Design Guidelines

Design guidelines in the form of PSDs are available for download for your convenience at:
